NOVA SWISS needle valves afford a maximum of safety and reliability, even under adverse operating conditions. The valves can be installed in either direction and will effectively seal both gaseous and liquid media. The heart of the valve is the specially shaped seat and the two-piece non-rotating stem. The longevity and dependability of the valves are increased by the fact that the stem will not seize against the seat. Pressure-containing parts are made of high-grade corrosion-resistant stainless steel.

Item Name	Needle Valves	Connection Type	English
Connections	MPCT	Pressure Rating [kpsi]	20
Pressure Rating [bar]	1380	Tube Diameter [inches]	1/4
Tube Diameter [mm]	6.4	Orifice [inches]	0.11
Orifice [mm]	2.8	Note	NOVA SWISS high and medium pressure valves are delivered complete with glands and collars.
